CAUTIONARY STATEMENTS

The information contained in this quarterly report on Form 10-Q is not a complete description of our business or the risks associated with an investment in our company. We urge you to carefully review and consider the various disclosures made by us in this report and in our other filings with the Securities and Exchange Commission ("SEC"), including our annual report on Form 10-K for the year ended December 31, 2004, that discuss our business in greater detail.

This report contains certain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements relate to, among other things, the operating performance of our investments and financing needs. Forward-looking statements are generally identifiable by use of forward-looking terminology such as "may," "will," "should," "potential," "intend," "expect," "endeavor," "seek," "anticipate," "estimate," "overestimate," "underestimate," "believe," "could," "project," "predict," "continue" or other similar words or expressions. Forward-looking statements are based on certain assumptions, discuss future expectations, describe future plans and strategies, contain projections of results of operations or of financial condition or state other forward-looking information. Our ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Although we believe that the expectations reflected in such forward-looking statements are based on reasonable assumptions, our actual results and performance could differ materially from those set forth in the forward-looking statements. These forward-looking statements involve risks, uncertainties and other factors that may cause our actual results in future periods to differ materially from forecasted results. Factors which could have a material adverse effect on our operations and future prospects include, but are not limited to, changes in economic conditions generally and the real estate and bond markets specifically; adverse changes in the financing markets we access affecting our ability to finance our real estate securities portfolios in general or particular real estate related assets, or in a manner that maintains our historic net spreads; changes in interest rates and/or credit spreads, as well as the success of our hedging strategy in relation to such changes; the quality and size of the investment pipeline and the rate at which we can invest our cash, including cash obtained in connection with CBO financings; impairments in the value of the collateral underlying our real estate securities, real estate related loans and residential mortgage loans; the relation of any impairments in the value of our real estate securities portfolio, loans or operating real estate to our judgments as to whether changes in the market value of our securities are temporary or not and whether circumstances bearing on the value of our loans or operating real estate warrant changes in carrying values; changes in the markets; legislative/regulatory changes; completion of pending investments; the availability and cost of capital for future investments; competition within the finance and real estate industries; and other risks detailed from time to time in our SEC reports. Readers are cautioned not to place undue reliance on any of these forward-looking statements, which reflect our management's views as of the date of this report. The factors noted above could cause our actual results to differ significantly from those contained in any forward-looking statement. For a discussion of our critical accounting policies see "Management's Discussion and Analysis of Financial Condition and Results of Operations - Application of Critical Accounting Policies."

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. We are under no duty to update any of the forward-looking statements after the date of this report to conform these statements to actual results.

NEWCASTLE INVESTMENT CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)  
MARCH 31, 2005  
(dollars in tables in thousands, except per share data)

1. GENERAL

Newcastle Investment Corp. (and its subsidiaries, "Newcastle") is a Maryland corporation that was formed in 2002. Newcastle conducts its business through three primary segments: (i) real estate securities and real estate related loans, (ii) operating real estate, and (iii) residential mortgage loans.

The following table presents information on shares of Newcastle's common stock issued subsequent to its formation:

<TABLE>  
<CAPTION>

Year	Shares Issued	Range of Issue Prices (1)	Net Proceeds (millions)
------	---------------	---------------------------	-------------------------

<S>	<C>	<C>	<C>	<C>
Formation	16,488,517		N/A	N/A
2002	7,000,000	\$	13.00	\$ 80.0
2003	7,886,316		\$20.35-\$22.85	\$163.4
2004	8,484,648		\$26.30-\$31.40	\$224.3
1st Quarter 2005	3,899,430	\$	29.60	\$105.7
	-----			
March 31, 2005	43,758,911			
	=====			

</TABLE>

(1) Excludes shares issued pursuant to the exercise of options and shares issued to Newcastle's independent directors.

Approximately 2.8 million shares of Newcastle's common stock were held by an affiliate of the Manager (and its principals, as defined below) at March 31, 2005. In addition, an affiliate of the Manager held options to purchase approximately 1.3 million shares of Newcastle's common stock at March 31, 2005.

Newcastle is organized and conducts its operations to qualify as a real estate investment trust ("REIT") for U.S. federal income tax purposes. As such, Newcastle will generally not be subject to U.S. federal income tax on that portion of its income that is distributed to stockholders if it distributes at least 90% of its REIT taxable income to its stockholders by prescribed dates and complies with various other requirements.

Newcastle is party to a management agreement (the "Management Agreement") with Fortress Investment Group LLC (the "Manager"), an affiliate, under which the Manager advises Newcastle on various aspects of its business and manages its day-to-day operations, subject to the supervision of Newcastle's board of directors. For its services, the Manager receives an annual management fee and incentive compensation, both as defined in the Management Agreement.

The accompanying consolidated financial statements and related notes of Newcastle have been prepared in accordance with accounting principles generally accepted in the United States for interim financial reporting and the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, certain information and footnote disclosures normally included in financial statements prepared under accounting principles generally accepted in the United States have been condensed or omitted. In the opinion of management, all adjustments considered necessary for a fair presentation of Newcastle's financial position, results of operations and cash flows have been included and are of a normal and recurring nature. The operating results presented for interim periods are not necessarily indicative of the results that may be expected for any other interim period or for the entire year. These financial statements should be read in conjunction with Newcastle's December 31, 2004 consolidated financial statements and notes thereto included in Newcastle's annual report on Form 10-K filed with the Securities and Exchange Commission. Capitalized terms used herein, and not otherwise defined, are defined in Newcastle's December 31, 2004 consolidated financial statements.

## 2. INFORMATION REGARDING BUSINESS SEGMENTS

Newcastle conducts its business through three primary segments: real estate securities and real estate related loans, operating real estate and residential mortgage loans.

MARCH 31, 2005

(dollars in tables in thousands, except per share data)

3. REAL ESTATE SECURITIES

The following is a summary of Newcastle's real estate securities at March 31, 2005, all of which are classified as available for sale and are therefore marked to market through other comprehensive income.

<TABLE>  
<CAPTION>

Average		Weighted							
		Current Face	Amortized	Gross Unrealized		Carrying	Number of	S&P	
Maturity	Asset Type	Amount	Cost Basis	Gains	Losses	Value	Securities	Rating	Coupon
Yield (Years)									
<S>	<C>	<C>	<C>	<C>	<C>	<C>	<C>	<C>	<C>
6.81%	7.26	\$1,018,290	\$ 990,663	\$41,037	\$(15,280)	\$1,016,420	161	BBB-	6.17%
5.76%	2.10	578,517	575,402	8,994	(471)	583,925	68	BBB	5.48%
6.79%	6.21	166,283	163,812	2,442	(2,332)	163,922	28	BB+	6.51%
6.09%	7.23	715,070	729,943	26,595	(8,837)	747,701	86	BBB	6.47%
8.84%	6.36	235,257	211,367	3,288	(5,939)	208,716	12	B	7.19%
4.79%	3.73	320,503	318,735	6,255	--	324,990	46	A-	4.67%
8.44%	5.39	74,607	72,627	1,703	(887)	73,443	17	BBB+	7.19%
4.48%	3.32	310,454	312,444	339	(2,812)	309,971	7	AAA	4.68%
Total/Average (A)		\$3,418,981	\$3,374,993	\$90,653	\$(36,558)	\$3,429,088	425	BBB	5.95%

</TABLE>

(A) The total current face amount of fixed rate securities was \$2,570.4 million, and of floating rate securities was \$848.6 million.

Unrealized losses that are considered other than temporary are recognized currently in income. There were no such losses incurred during the three months ended March 31, 2005. The unrealized losses on Newcastle's securities are primarily the result of market factors, rather than credit impairment, and Newcastle believes their carrying values are fully recoverable over their expected holding period. None of the securities were delinquent as of March 31, 2005.

<TABLE>

Securities in an Unrealized Loss Position		Less Than Twelve Month		Twelve or More Months					
Yield (Years)		Amount	Cost Basis	Gains	Losses	Value	Number of	S&P	Coupon
5.83%	6.52	\$1,206,519	\$1,213,721	\$--	\$(23,196)	\$1,190,525	134	BBB	5.82%
5.62%	7.39	174,123	175,482	--	(13,362)	162,120	24	BBB-	5.62%

</TABLE>

Total		\$1,380,642	\$1,389,203	\$--	\$(36,558)	\$1,352,645	158	BBB	5.79%
5.80%	6.63								
====	====	=====	=====	===	=====	=====	===	===	=====

The unrealized losses on most of the securities in the "Twelve or More Months" category were mostly caused by changes in market interest rates as well as some change in market credit spreads. With respect to two of such securities, the unrealized losses were primarily caused by market perceptions of the credit quality of such securities. None of the securities in this category are in default or delinquent and Newcastle has performed credit analyses in relation to such securities which support its belief that the carrying values of such securities are fully recoverable over their expected holding period. Although management expects to hold these securities until their recovery, there is no assurance that such securities will not be sold or at what price they may be sold.

#### 4. REAL ESTATE RELATED LOANS AND RESIDENTIAL MORTGAGE LOANS

The following is a summary of real estate related loans and residential mortgage loans at March 31, 2005. The loans contain various terms, including fixed and floating rates, self-amortizing and interest only. They are generally subject to prepayment.

<TABLE>  
<CAPTION>

Loan Type	Current Face Amount	Carrying Value	Loan Count	Wtd. Avg. Yield	Weighted Average Maturity (Years) (C)	Delinquent Carrying Amount
<S>	<C>	<C>	<C>	<C>	<C>	<C>
B-Notes	\$117,159	\$117,598	22	6.85%	2.52	\$ --
Mezzanine Loans (A)	103,558	103,538	5	7.27%	2.27	--
Bank Loans	146,299	146,299	3	7.14%	1.89	--
Real Estate Loans	12,609	12,182	1	19.73%	2.75	--

Related Loans	\$569,970	\$567,489	146	7.71%	2.31	\$22,527
Residential Loans	\$572,842	\$581,528	1,502	3.73%	3.74	\$ 9,155
Manufactured Housing Loans	323,656	307,451	8,021	7.85%	4.92	2,492
Total Residential Mortgage Loans	\$896,498	\$888,979	\$9,523	5.15%	4.16	\$11,647

</TABLE>

#### NEWCASTLE INVESTMENT CORP. AND SUBSIDIARIES

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

MARCH 31, 2005

(dollars in tables in thousands, except per share data)

- (A) One of these loans has a contractual exit fee which Newcastle will begin to accrue if and when management believes it is probable that such exit fee will be received.
- (B) In October 2003, pursuant to FIN No.46, Newcastle consolidated an entity which holds a portfolio of commercial mortgage loans which has been securitized. This investment, which is referred to as the ICH CMO, was previously treated as a non-consolidated residual interest in such securitization. Newcastle exercises no control over the management or resolution of these assets. The primary effect of the consolidation is the requirement that Newcastle reflect the gross loan assets and gross bonds payable of this entity in its financial statements.
- (C) The weighted average maturity for the residential mortgage loan portfolio was calculated based on a constant prepayment rate (CPR) of 20%.

Newcastle has entered into credit derivative instruments with a major investment bank, whereby Newcastle receives the sum of all interest, fees and any positive change in value amounts (the total return cash flows) from a reference asset with a specified notional amount, and pays interest on such notional plus any negative change in value amounts from such asset. These agreements are recorded in Derivative Assets and treated as non-hedge derivatives for accounting purposes and are therefore marked to market through income. Under the agreements, Newcastle is required to post an initial margin deposit to an interest bearing account and additional margin may be payable in the event of a decline in value of the reference asset. Any margin on deposit, less any

negative change in value amounts, will be returned to Newcastle upon termination of the contract. The following table presents information on these instruments as of March 31, 2005.

<TABLE>  
<CAPTION>

Month Executed	Reference Asset	Notional Amount	Margin Amount	Receive Interest Rate	Pay Interest Rate	Fair Value
<S>	<C>	<C>	<C>	<C>	<C>	<C>
November 2004	Term loan to a retail mall REIT	\$106,760	\$18,190	LIBOR + 2.25%	LIBOR + 0.500%	\$1,855
February 2005	Term loan to a diversified real estate and finance company	\$100,000	\$20,000	LIBOR + 3.00%	LIBOR + 0.625%	\$ 192

10

NEWCASTLE INVESTMENT CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)  
MARCH 31, 2005  
(dollars in tables in thousands, except per share data)

5. RECENT ACTIVITIES

In April 2005, Newcastle completed its seventh CBO financing, whereby a portfolio of real estate securities and loans was purchased by a consolidated subsidiary which issued \$447.0 million face amount of investment grade senior bonds and \$53.0 million face amount of non-investment grade subordinated bonds in a private placement. The non-investment grade bonds were retained by Newcastle and the \$442.0 million carrying amount of the investment grade bonds, which bore interest at a weighted average effective rate, including discount and issue cost amortization and the effect of hedges, of 4.48%, had an expected weighted average life of approximately 8.9 years. The largest tranche, the \$323.0 million face amount of Class I-MM notes, was issued subject to remarketing procedures and related agreements whereby the securities are remarketed and sold on a periodic basis. Five classes of the senior bonds bear floating interest rates. Newcastle obtained an interest rate swap in order to hedge its exposure to the risk of changes in market interest rates with respect to these bonds.

Newcastle enters into short-term warehouse agreements with major investment banks for the right to purchase commercial mortgage backed securities, unsecured REIT debt, real estate related loans and asset backed securities for its real estate securities portfolios, prior to their being financed with CBOs. These agreements are treated as non-hedge derivatives for accounting purposes and are therefore marked to market through current income. If the related CBO is not consummated, except as a result of Newcastle's gross negligence, willful misconduct or breach of contract, Newcastle will be required to pay the Net Loss, if any, as defined, up to the related deposit, less any Excess Carry Amount, as defined, earned on such deposit. The following table summarizes the agreements (in thousands):

<TABLE>  
<CAPTION>

March 31, 2005				Income Recorded
Deal Status	Collateral Accumulated (1)	Aggregate Deposit	Fair Value	Three Months Ended March 31, 2005
<S>	<C>	<C>	<C>	<C>
Open	\$370,768	\$40,440	\$41,793	\$844

</TABLE>

- (1) Excludes \$32.5 million of collateral accumulated on balance sheet and recorded in real estate securities.

In March 2005, Newcastle closed on the sale of the vacant property in the Bell Canada portfolio for CAD \$14.3 million (USD \$11.8 million) and recorded a gain of approximately \$0.5 million. In March 2005, Newcastle agreed to the terms for a sale of the industrial/distribution property in the Bell Canada portfolio. The terms include a gross sale price of CAD \$47.6 million (USD \$39.3 million at March 31, 2005) and Newcastle has received a nonrefundable deposit thereon. This property is classified as Real Estate Held for Sale.

An unconsolidated subsidiary of Newcastle's that owns a portfolio of convenience and retail gas stores had entered into a property management agreement with a third party servicer which, in March 2005, was transferred to an affiliate of our Manager; the related fees, approximately \$20,000 per year for three years, were not charged.

In January 2005, Newcastle sold 3.3 million shares of its common stock in a public offering at a price to the public of \$29.60 per share, for net

proceeds of approximately \$96.6 million. For the purpose of compensating the Manager for its successful efforts in raising capital for Newcastle, in connection with this offering, Newcastle granted options to the Manager to purchase 330,000 shares of Newcastle's common stock at the public offering price, which were valued at approximately \$1.1 million.

During the first quarter of 2005, Newcastle's Manager and certain of the Manager's employees exercised options to purchase approximately 0.6 million shares of Newcastle's common stock. In connection with this exercise, Newcastle received proceeds of approximately \$9.1 million.

In January 2005, Newcastle, through a consolidated subsidiary, acquired a portfolio of approximately 8,100 manufactured housing loans for an aggregate purchase price of approximately \$308.2 million. The loans, which were all current at the time of acquisition, are primarily fixed rate with a weighted average coupon of approximately 9.00% and a weighted average remaining term of approximately 5.00 years. Newcastle's acquisition was initially funded with approximately \$246.5 million of one-year debt provided by two investment banks which is subject to adjustment based on the market value and performance of the related portfolio. The debt bears interest at LIBOR + 1.25%. Newcastle obtained an interest rate swap in order to hedge its exposure to the risk of changes in market interest rates with respect to this financing and the anticipated permanent financing of this portfolio.

In January 2005, Newcastle entered into a servicing agreement with a portfolio company of a private equity fund advised by an affiliate of Newcastle's manager for them to service the above described portfolio of manufactured housing loans. As compensation under the servicing agreement, the portfolio company will receive, on a monthly basis, a net servicing fee equal to 1.00% per annum on the unpaid principal balance of the loans being serviced.

6. DERIVATIVE INSTRUMENTS

The following table summarizes the notional amounts and fair (carrying) values of Newcastle's derivative financial instruments as of March 31, 2005.

<TABLE>  
<CAPTION>

	Notional Amount -----	Fair Value -----	Longest Maturity -----
<S>	<C>	<C>	<C>
Interest rate caps treated as hedges (A)	\$ 381,909	\$ 2,591	October 2015
Interest rate swaps, treated as hedges (A)	\$2,119,950	\$31,696	November 2018
Non-hedge derivative obligations (A) (B)	(B)	\$ (527)	July 2038

</TABLE>

- (A) Included in Derivative Assets or Derivative Liabilities, as applicable. Derivative Liabilities also includes accrued interest.
- (B) Represents two essentially offsetting interest rate caps and two essentially offsetting interest rate swaps, each with notional amounts of \$32.5 million, an interest rate cap with a notional amount of \$17.5 million, and one interest rate swap with a notional amount of \$2.0 million

7. EARNINGS PER SHARE

Newcastle is required to present both basic and diluted earnings per share ("EPS"). Basic EPS is calculated by dividing net income available for common stockholders by the weighted average number of shares of common stock outstanding during each period. Diluted EPS is calculated by dividing net income available for common stockholders by the weighted average number of shares of common stock outstanding plus the additional dilutive effect of common stock equivalents during each period. Newcastle's common stock equivalents are its outstanding stock options. Net income available for common stockholders is equal to net income less preferred dividends.

The following is a reconciliation of the weighted average number of shares of common stock outstanding on a diluted basis.

<TABLE>  
<CAPTION>

THREE MONTHS ENDED MARCH 31, -----	
2005	2004
-----	-----

<S>	<C>	<C>
Weighted average number of shares of common stock outstanding, basic	43,221,792	34,401,800

</TABLE>

#### 8. INCOME TAXES

Newcastle Investment Corp. is organized and conducts its operations to qualify as a REIT under the Internal Revenue Code. A REIT will generally not be subject to U.S. federal income tax on that portion of its income that it distributes to its stockholders if it distributes at least 90% of its REIT taxable income to its stockholders by prescribed dates and complies with various other requirements. Newcastle has elected to treat NC Circle Holdings II LLC as a taxable REIT subsidiary ("TRS"), effective February 27, 2004. NC Circle Holdings II LLC owns a portion of Newcastle's investment in one of its unconsolidated subsidiaries. To the extent that NC Circle Holdings II LLC generates taxable income, Newcastle has provided for relevant income taxes based on a blended statutory rate of 40%. Newcastle accounts for income taxes in accordance with the provisions of SFAS No. 109 "Accounting for Income Taxes." Under SFAS No. 109, Newcastle accounts for income taxes using the asset and liability method under which deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. No such material differences have been recognized through March 31, 2005.

12

#### ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following should be read in conjunction with the unaudited consolidated financial statements and notes included herein.

##### GENERAL

Newcastle Investment Corp. is a real estate investment and finance company. We invest in real estate securities, loans and other real estate related assets. We seek to deliver stable dividends and attractive risk-adjusted returns to our stockholders through prudent asset selection, active management and the use of match-funded financing structures, which reduce our interest rate and financing risks. Our objective is to maximize the difference between the yield on our investments and the cost of financing these investments while hedging our interest rate risk. We emphasize asset quality, diversification, match-funded financing and credit risk management.

We own a diversified portfolio of moderately credit sensitive real estate debt investments including securities and loans.

Our portfolio of real estate securities includes commercial mortgage backed securities (CMBS), senior unsecured debt issued by property REITs, real estate related asset backed securities (ABS) and agency residential mortgage backed securities (RMBS). Mortgage backed securities are interests in or obligations secured by pools of mortgage loans. We generally target investments rated A through BB, except for our agency RMBS which are generally considered AAA rated. We also own, directly and indirectly, interest in loans and pools of loans, including real estate related loans, commercial mortgage loans, residential mortgage loans, and manufactured housing loans. We also own, directly and indirectly, interests in operating real estate.

We employ leverage in order to achieve our return objectives. We do not have a predetermined target debt to equity ratio as we believe the appropriate leverage for the particular assets we are financing depends on the credit quality of those assets. As of March 31, 2005, our debt to equity ratio was approximately 4.7 to 1. We maintain access to a broad array of capital resources in an effort to insulate our business from potential fluctuations in the availability of

capital. We utilize multiple forms of financing including collateralized bond obligations (CBOs), other securitizations, and term loans, as well as short term financing in the form of repurchase agreements.

We seek to match-fund our investments with respect to interest rates and maturities in order to minimize the impact of interest rate fluctuations on earnings and reduce the risk of refinancing our liabilities prior to the maturity of the investments. We seek to finance a substantial portion of our real estate securities and loans through the issuance of debt securities in the form of CBOs, which are obligations issued in multiple classes secured by an underlying portfolio of securities. Our CBO financings offer us the structural flexibility to buy and sell certain investments to manage risk and, subject to certain limitations, to optimize returns.

We were formed in 2002 as a subsidiary of Newcastle Investment Holdings Corp. (referred to herein as Holdings). Prior to our initial public offering, Holdings contributed to us certain assets and liabilities in exchange for approximately 16.5 million shares of our common stock. Our operations commenced in July 2002. In May 2003, Holdings distributed to its stockholders all of the shares of our common stock that it held, and it no longer owns any of our common equity. As of March 31, 2005, approximately 2.8 million shares of our common stock were held by an affiliate of our manager and its principals. In addition, an affiliate of our manager held options to purchase approximately 1.3 million shares of our common stock at March 31, 2005.

The following table presents information on shares of our common stock issued since our formation:

Year	Shares Issued	Range of Issue Prices (1)	Net Proceeds (millions)
----	-----	-----	-----
<S>	<C>	<C>	<C>
Formation	16,488,517	N/A	N/A
2002	7,000,000	\$ 13.00	\$ 80.0
2003	7,886,316	\$20.35-\$22.85	\$163.4
2004	8,484,648	\$26.30-\$31.40	\$224.3
1st Quarter 2005	3,899,430	\$ 29.60	\$105.7
	-----		
March 31, 2005	43,758,911		
	=====		

(1) Excludes shares issued pursuant to the exercise of options and shares issued to Newcastle's independent directors.

13

We are organized and conduct our operations to qualify as a REIT for U.S. federal income tax purposes. As such, we will generally not be subject to U.S. federal income tax on that portion of our income that is distributed to stockholders if we distribute at least 90% of our REIT taxable income to our stockholders by prescribed dates and comply with various other requirements.

We conduct our business by investing in three primary business segments: (i) real estate securities and real estate related loans, (ii) operating real estate and (iii) residential mortgage loans.

Revenues attributable to each segment are disclosed below (unaudited) (in thousands).

For the Three Months Ended March 31,	Real Estate Securities and Real Estate Related Loans	Operating Real Estate	Residential Mortgage Loans	Unallocated	Total
-----	-----	-----	-----	-----	-----
<S>	<C>	<C>	<C>	<C>	<C>
2005	\$69,546	\$1,276	\$11,982	\$147	\$82,951
2004	\$49,841	\$1,156	\$ 4,202	\$110	\$55,309

14

#### APPLICATION OF CRITICAL ACCOUNTING POLICIES

Management's discussion and analysis of financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles ("GAAP"). The preparation of financial statements in conformity with GAAP requires the use of estimates and assumptions that could affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities and the reported amounts of revenue and expenses. Actual results could differ from these estimates. The following is a summary of our accounting

policies that are most effected by judgments, estimates and assumptions.

#### Various Interest Entities

In December 2003, Financial Accounting Standards Board Interpretation ("FIN") No. 46R "Consolidation of Variable Interest Entities" was issued as a modification of FIN 46. FIN 46R clarified the methodology for determining whether an entity is a variable interest entity ("VIE") and the methodology for assessing who is the primary beneficiary of a VIE. VIEs are defined as entities in which equity investors do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties. A VIE is required to be consolidated by its primary beneficiary, and only by its primary beneficiary, which is defined as the party who will absorb a majority of the VIE's expected losses or receive a majority of the expected residual returns as a result of holding variable interests.

We have historically consolidated our existing CBO transactions (the "CBO Entities") because we own the entire equity interest in each of them, representing a substantial portion of their capitalization, and we control the management and resolution of their assets. We have determined that certain of the CBO Entities are VIEs and that we are the primary beneficiary of each of these VIEs and will therefore continue to consolidate them. We have also determined that the application of FIN 46R did not result in a change in our accounting for any other entities which were previously consolidated. However, it did cause us to consolidate one entity which was previously not consolidated, ICH CMO, as described below under "- Liquidity and Capital Resources." We will continue to analyze future CBO entities, as well as other investments, pursuant to the requirements of FIN 46R. These analyses require considerable judgment in determining the primary beneficiary of a VIE since they involve subjective probability weighting of subjectively determined possible cash flow scenarios. The result could be the consolidation of an entity acquired or formed in the future that would otherwise not have been consolidated or the non-consolidation of such an entity that would otherwise have been consolidated.

#### Valuation and Impairment of Securities

We have classified our real estate securities as available for sale. As such, they are carried at fair value with net unrealized gains or losses reported as a component of accumulated other comprehensive income. Fair value is based primarily upon broker quotations, as well as counterparty quotations, which provide valuation estimates based upon reasonable market order indications or a good faith estimate thereof. These quotations are subject to significant variability based on market conditions, such as interest rates and credit spreads. Changes in market conditions, as well as changes in the assumptions or methodology used to determine fair value, could result in a significant increase or decrease in our book equity. We must also assess whether unrealized losses on securities, if any, reflect a decline in value which is other than temporary and, accordingly, write the impaired security down to its value through earnings. For example, a decline in value is deemed to be other than temporary if it is probable that we will be unable to collect all amounts due according to the contractual terms of a security which was not impaired at acquisition. Temporary declines in value generally result from changes in market factors, such as market interest rates and credit spreads, or from certain macroeconomic events, including market disruptions and supply changes, which do not directly impact our ability to collect amounts contractually due. Significant judgment is required in this analysis. To date, no such write-downs have been made.

#### Revenue Recognition on Securities

Income on these securities is recognized using a level yield methodology based upon a number of assumptions that are subject to uncertainties and contingencies. Such assumptions include the expected disposal date of such security and the rate and timing of principal and interest receipts (which may be subject to prepayments, delinquencies and defaults). These uncertainties and contingencies are difficult to predict and are subject to future events, and economic and market conditions, which may alter the assumptions. For securities acquired at a discount for credit quality, the income recognized is based on a "loss adjusted yield" whereby a provision for expected credit losses is accrued on a periodic basis.

#### Valuation of Derivatives

Similarly, our derivative instruments are carried at fair value pursuant to Statement of Financial Accounting Standards ("SFAS") No. 133 "Accounting for Derivative Instruments and Hedging Activities," as amended. Fair value is based on counterparty quotations. To the extent they qualify as hedges under SFAS No. 133, net unrealized gains or losses are reported as a component of accumulated other comprehensive income; otherwise, they are reported as a component of current income. Fair values of such derivatives are subject to significant variability based on many of the same factors as the securities discussed above. The results of such variability could be a significant increase or decrease in our book equity and/or earnings.

## Impairment of Loans

We purchase, directly and indirectly, real estate related, commercial mortgage and residential mortgage loans, including manufactured housing loans, to be held for investment. We must periodically evaluate each of these loans or loan pools for possible impairment. Impairment is indicated when it is deemed probable that we will be unable to collect all amounts due according to the contractual terms of the loan, or, for loans acquired at a discount for credit quality, when it is deemed probable that we will be unable to collect as anticipated. Upon determination of impairment, we would establish a specific valuation allowance with a corresponding charge to earnings. Significant judgment is required both in determining impairment and in estimating the resulting loss allowance. In 2003, a loss allowance of approximately \$0.1 million was recorded with respect to the residential mortgage loans in our portfolio. No other loan impairments have been recorded to date.

## Revenue Recognition on Loans

Income on these loans is recognized similarly to that on our securities and is subject to similar uncertainties and contingencies. For loans acquired at a discount for credit quality, the income recognized is based on a "loss adjusted yield" whereby a provision for expected credit losses is accrued on a periodic basis.

## Impairment of Operating Real Estate

We own operating real estate held for investment. We review our operating real estate for impairment annually or whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Upon determination of impairment, we would record a write-down of the asset, which would be charged to earnings. Significant judgment is required both in determining impairment and in estimating the resulting write-down. To date, we have determined that no write-downs have been necessary on the operating real estate in our portfolio. In addition, when operating real estate is classified as held for sale, it must be recorded at the lower of its carrying amount or fair value less costs of sale. Significant judgment is required in determining the fair value of such properties. At March 31, 2005, we have two properties classified as held for sale. No losses have been recorded in connection with such properties.

16

## RESULTS OF OPERATIONS

The following table summarizes the changes in our results of operations from the three months ended March 31, 2004 to the three months ended March 31, 2005 (dollars in thousands):

<TABLE>  
<CAPTION>

	Period to Period Increase (Decrease)	Period to Period Percent Change	Explanation
<S>	<C>	<C>	<C>
Interest Income	\$30,685	62.6%	(1)
Rental and escalation income	117	10.2%	(2)
Gain on settlement of investments	(3,160)	(61.5)%	(3)
Interest expense	20,675	73.6%	(1)
Property operating expense	53	8.3%	(2)
Loan and security servicing expense	801	102.4%	(1)
General and administrative expense	(249)	(21.8)%	(4)
Management fee to affiliate	866	36.1%	(5)
Incentive compensation to affiliate	(402)	(16.9)%	(5)
Depreciation and amortization	23	20.4%	(2)
Equity in earnings of unconsolidated subsidiaries, net of taxes on related taxable subsidiaries	630	51.5%	(6)
	-----	-----	
Income from continuing operations	\$ 6,505	31.0%	
	=====	=====	

</TABLE>

(1) Changes in interest income and expense from the three months ended March 31, 2004 to the three months ended March 31, 2005 are primarily related to our acquisition of interest bearing assets and related financings, as follows:

<TABLE>  
<CAPTION>

	Period to Period Increase (Decrease)	
<S>	<C>	<C>
	-----	-----
	Interest Income	Interest Expense
	-----	-----

Real estate security and loan portfolios (A)	\$11,861	\$ 8,447
Agency RMBS	2,325	2,080
Residential mortgage loan portfolio	1,755	2,027
Manufactured housing loan portfolio	6,394	3,118
Other real estate related loans	5,323	533
Other (B)	3,027	4,470
	-----	-----
	\$30,685	\$20,675
	=====	=====

</TABLE>

- (A) Represents our fifth and sixth CBO financings and the acquisition of the related collateral, as well as the deposit on our seventh CBO financing.
- (B) Primarily due to increasing interest rates on floating rate assets and liabilities owned during the entire period.

Changes in loan and security servicing expense are also primarily due to these acquisitions.

- (2) These changes are primarily the result of the effect of the sale of certain properties and the termination of a lease, offset by foreign currency fluctuations.
- (3) These changes are primarily a result of the volume of sales of real estate securities. Sales of real estate securities are based on a number of factors including credit, asset type and industry and can be expected to increase or decrease from time to time. Periodic fluctuations in the volume of sales of securities is dependent upon, among other things, management's assessment of credit risk, asset concentration, portfolio balance and other factors.
- (4) The decrease in general and administrative expense is primarily a result of decreased Canadian taxes, offset by increased professional fees related to our compliance with the Sarbanes-Oxley Act of 2002.
- (5) The increase in management fees is a result of our increased size resulting from our equity issuances during this period. The decrease in incentive compensation is primarily a result of the FFO loss we recorded related to the sale of a property during the period, offset by our increased earnings.
- (6) The increase in earnings from unconsolidated subsidiaries is primarily a result of our early 2004 acquisition of an interest in an LLC which owns a portfolio of convenience and retail gas stores. Note that the amounts shown are net of income taxes on related taxable subsidiaries.

17

#### LIQUIDITY AND CAPITAL RESOURCES

Liquidity is a measurement of our ability to meet potential cash requirements, including ongoing commitments to repay borrowings, fund and maintain investments, and other general business needs. Additionally, to maintain our status as a REIT under the Internal Revenue Code, we must distribute annually at least 90% of our REIT taxable income. Our primary sources of funds for liquidity consist of net cash provided by operating activities, borrowings under loans, and the issuance of debt and equity securities. Our debt obligations are generally secured directly by our investment assets.

We expect that our cash on hand and our cash flow provided by operations will satisfy our liquidity needs with respect to our current investment portfolio over the next twelve months. However, we currently expect to seek additional capital in order to grow our investment portfolio. We have an effective shelf registration statement with the SEC which allows us to issue various types of securities, such as common stock, preferred stock, depository shares, debt securities and warrants, from time to time, up to an aggregate of \$750 million, of which approximately \$351 million remained available as of March 31, 2005.

We expect to meet our long-term liquidity requirements, specifically the repayment of our debt obligations, through additional borrowings and the liquidation or refinancing of our assets at maturity. We believe that the value of these assets is, and will continue to be, sufficient to repay our debt at maturity under either scenario. Our ability to meet our long-term liquidity requirements relating to capital required for the growth of our investment portfolio is subject to obtaining additional equity and debt financing. Decisions by investors and lenders to enter into such transactions with us will depend upon a number of factors, such as our historical and projected financial performance, compliance with the terms of our current credit arrangements, industry and market trends, the availability of capital and our investors' and lenders' policies and rates applicable thereto, and the relative attractiveness of alternative investment or lending opportunities. We maintain access to a broad array of capital resources in an effort to insulate our business from potential fluctuations in the availability of capital.

Our ability to execute our business strategy, particularly the growth of our investment portfolio, depends to a significant degree on our ability to obtain additional capital. Our core business strategy is dependent upon our ability to finance our real estate securities and other real estate related assets with match-funded debt at rates that provide a positive net spread. If spreads for such liabilities widen or if demand for such liabilities ceases to exist, then our ability to execute future financings will be severely restricted.

We expect to meet our short-term liquidity requirements generally through our cash flow provided by operations, as well as investment specific borrowings. In addition, at March 31, 2005 we had an unrestricted cash balance of \$28.8 million. Our cash flow provided by operations differs from our net income due to four primary factors: (i) accretion of discount or premium on our real estate securities and loans, discount on our debt obligations, deferred financing costs and interest rate cap premiums, and deferred hedge gains and losses, (ii) gains and losses from sales of assets financed with CBOs, (iii) depreciation of our operating real estate, and (iv) straight-lined rental income. Proceeds from the sale of assets which serve as collateral for our CBO financings, including gains thereon, are required to be retained in the CBO structure until the related bonds are retired and are therefore not available to fund current cash needs.

Our match-funded investments are financed long-term and their credit status is continuously monitored; therefore, these investments are expected to generate a generally stable current return, subject to interest rate fluctuations. See "Quantitative and Qualitative Disclosures About Market Risk -- Interest Rate Exposure" below. Our remaining investments, financed with short term repurchase agreements, are also subject to refinancing risk upon the maturity of the related debt. See "Debt Obligations" below.

With respect to our operating real estate, we expect to incur expenditures of approximately \$0.2 million relating to tenant improvements, in connection with the inception of leases, and capital expenditures during the twelve months ending March 31, 2006.

With respect to one of our real estate related loans, we were committed to fund up to an additional \$22.7 million at March 31, 2005, subject to certain conditions to be met by the borrower.

18

#### Debt Obligations

The following tables present certain information regarding our debt obligations and related hedges as of March 31, 2005 (unaudited) (dollars in thousands):

	=====

</TABLE>

Certain of the debt obligations included above are obligations of our consolidated subsidiaries which own the related collateral. In some cases, including the CBO and Other Bonds Payable, such collateral is not available to other creditors of ours.

In connection with the sale of two classes of CBO bonds, we entered into two interest rate swaps and three interest rate cap agreements that do not qualify for hedge accounting.

In November 2001, we sold the retained subordinated \$17.5 million Class E Note from our first CBO to a third party. The Class E Note bore interest at a fixed rate of 8.0% and had a stated maturity of June 2038. The sale of the Class E Note represented an issuance of debt and was recorded as additional CBO bonds payable. In April 2002, a wholly owned subsidiary of ours repurchased the Class E Note. The repurchase of the Class E Note represented a repayment of debt and was recorded as a reduction of CBO bonds payable. The Class E Note is included in the collateral for our second CBO. The Class E Note is eliminated in consolidation.

One class of CBO bonds, with a \$395.0 million face amount, was issued subject to remarketing procedures and related agreements whereby such bonds are remarketed and sold on a periodic basis. These bonds are fully insured by a third party with respect to the timely payment of interest and principal thereon.

In October 2003, pursuant to FIN No. 46R, we consolidated an entity which holds a portfolio of commercial mortgage loans which has been securitized. This investment, which we refer to as the ICH CMO, was previously treated as a non-consolidated residual interest in such securitization. We exercise no control over the management or resolution of these assets. The primary effect of the consolidation is the requirement that we reflect the gross loan assets and gross bonds payable of this entity in our financial statements.

In July 2004, we refinanced \$342.5 million of the AAA and AA bonds in our first CBO. \$322.5 million of AAA bonds were refinanced at LIBOR + 0.30% from LIBOR + 0.65% and \$20.0 million of AA bonds were refinanced at LIBOR + 0.50% from LIBOR + 0.80%.

20

#### Other

We have entered into credit derivative instruments with a major investment bank, whereby we receive the sum of all interest, fees and any positive change in value amounts (the total return cash flows) from a reference asset with a specified notional amount, and pay interest on such notional plus any negative change in value amounts from such asset. These agreements are recorded in Derivative Assets and treated as non-hedge derivatives for accounting purposes and are therefore marked to market through income. Under the agreements, we are required to post an initial margin deposit to an interest bearing account and additional margin may be payable in the event of a decline in value of the reference asset. Any margin on deposit, less any negative change in value amounts, will be returned to us upon termination of the contract. The following table presents information on these instruments as of March 31, 2005.

<TABLE>  
<CAPTION>

Month Executed	Reference Asset	Notional Amount	Margin Amount	Receive Interest Rate	Pay Interest Rate	Fair Value
<S>	<C>	<C>	<C>	<C>	<C>	<C>
November 2004	Term loan to a retail mall REIT	\$106,760	\$18,190	LIBOR + 2.25%	LIBOR + 0.500%	\$1,855
February 2005	Term loan to a diversified real estate and finance company	\$100,000	\$20,000	LIBOR + 3.00%	LIBOR + 0.625%	\$ 192

</TABLE>

We enter into short-term warehouse agreements with major investment banks for the right to purchase commercial mortgage backed securities, unsecured REIT debt, real estate related loans and asset backed securities for our real estate securities portfolios, prior to their being financed with CBOs. These agreements are treated as non-hedge derivatives for accounting purposes and are therefore

marked to market through current income. If the related CBO is not consummated, except as a result of our gross negligence, willful misconduct or breach of contract, we will be required to pay the Net Loss, if any, as defined, up to the related deposit, less any Excess Carry Amount, as defined, earned on such deposit. The following table summarizes the agreements (in thousands):

Deal Status	March 31, 2005		Fair Value	Income Recorded
	Collateral Accumulated(1)	Aggregate Deposit		Three Months Ended March 31, 2005
Open	\$370,768	\$40,440	\$41,793	\$844

(1) Excludes \$32.5 million of collateral accumulated on balance sheet and recorded in real estate securities.

In April 2005, we completed our seventh CBO financing, whereby a portfolio of real estate securities and loans was purchased by a consolidated subsidiary which issued \$447.0 million face amount of investment grade senior bonds and \$53.0 million face amount of non-investment grade subordinated bonds in a private placement. The non-investment grade bonds were retained by us and the \$442.0 million carrying amount of the investment grade bonds, which bore interest at a weighted average effective rate, including discount and issue cost amortization and the effect of hedges, of 4.48%, had an expected weighted average life of approximately 8.9 years. The largest tranche, the \$323.0 million face amount of Class I-MM notes, was issued subject to remarketing procedures and related agreements whereby the securities are remarketed and sold on a periodic basis. Five classes of the senior bonds bear floating interest rates. We obtained an interest rate swap in order to hedge our exposure to the risk of changes in market interest rates with respect to these bonds.

In January 2005, we acquired a portfolio of approximately 8,100 manufactured housing loans for an aggregate purchase price of approximately \$308.2 million. The loans, which were all current at the time of acquisition, are primarily fixed rate. Our acquisition was initially financed with approximately \$246.5 million of one-year bonds which are subject to adjustment based on the market value and performance of the related portfolio.

21

#### Stockholders' Equity

##### Common Stock

The following table presents information on shares of our common stock issued since December 31, 2004:

<TABLE>  
<CAPTION>

Period	Shares Issued	Range of Issue Prices(1)	Net Proceeds (millions)	Options Granted to Manager
<S>	<C>	<C>	<C>	<C>
First Quarter 2005	3,899,430	\$29.60	\$105.7	330,000

(1) Excludes shares issued pursuant to the exercise of options and shares issued to our independent directors.

At March 31, 2005, we had 43,758,911 shares of common stock outstanding.

As of March 31, 2005, our outstanding options were summarized as follows:

<S>	<C>
Held by the Manager	1,293,407
Issued to the Manager and subsequently transferred to certain of the Manager's employees	655,890
Held by directors	13,000
Total	1,962,297

##### Preferred Stock

In March 2003, we issued 2.5 million shares of 9.75% Series B Cumulative Redeemable Preferred Stock (the "Series B Preferred"). The Series B Preferred has a \$25 liquidation preference, no maturity date and no mandatory redemption. We have the option to redeem the Series B Preferred beginning in March 2008.

##### Other Comprehensive Income

During the three months ended March 31, 2005, our accumulated other

comprehensive income changed due to the following factors (in thousands):

<TABLE>	
<S>	
Accumulated other comprehensive income, December 31, 2004	<C> \$ 71,770
Unrealized (loss) on securities	(42,353)
Reclassification of realized (gain) on securities into earnings	(1,409)
Foreign currency translation	(719)
Reclassification of realized foreign currency translation into earnings	(542)
Unrealized gain on derivatives designated as cash flow hedges	44,637
Reclassification of realized (gain) on derivatives designated as cash flow hedges into earnings	(342)
	-----
Accumulated other comprehensive income, March 31, 2005	\$ 71,042
	=====

</TABLE>

Our book equity changes as our real estate securities portfolio and derivatives are marked-to-market each quarter, among other factors. The primary causes of mark-to-market changes are changes in interest rates and credit spreads. During the period, increasing interest rates offset by tightening credit spreads resulted in a net decrease in unrealized gains on our real estate securities portfolio. In an environment of widening credit spreads and increasing interest rates, we believe our new investment activities will benefit. While such an environment will likely result in a decrease in the fair value of our existing securities portfolio and, therefore, reduce our book equity and ability to realize gains on such existing securities, it will not directly affect our earnings or our cash flow or our ability to pay dividends.

In addition, the slight strengthening of the U.S. dollar against both the Canadian dollar and the Euro has resulted in an increase in unrealized losses on our Canadian and Belgian operating real estate.

#### Common Dividends Paid

<TABLE>

#### Cash Flow

Net cash flow provided by operating activities increased from \$2.4 million for the three months ended March 31, 2004 to \$14.1 million for the three months ended March 31, 2005. This change primarily resulted from the acquisition and settlement of our investments as described above.

Investing activities (used) (\$357.1 million) and (\$508.0 million) during the three months ended March 31, 2005 and 2004, respectively. Investing activities consisted primarily of investments made in certain real estate securities and other real estate related assets, net of proceeds from the sale or settlement of investments.

Financing activities provided \$333.9 million and \$501.5 million during the three months ended March 31, 2005 and 2004, respectively. The equity issuances, borrowings and debt issuances described above served as the primary sources of cash flow from financing activities. Offsetting uses included the payment of related deferred financing costs, the purchase of hedging instruments, the payment of dividends, and the repayment of debt as described above.

See the consolidated statements of cash flows included in our consolidated financial statements included herein for a reconciliation of our cash position for the periods described herein.

#### INTEREST RATE, CREDIT AND SPREAD RISK

We are subject to interest rate, credit and spread risk with respect to our investments.

Our primary interest rate exposures relate to our real estate securities, loans and floating rate debt obligations, as well as our interest rate swaps and caps. Changes in the general level of interest rates can effect our net interest income, which is the difference between the interest income earned on interest-earning assets and the interest expense incurred in connection with our interest-bearing liabilities and hedges. Changes in the level of interest rates also can effect, among other things, our ability to acquire real estate securities and loans, the value of our real estate securities, loans and derivatives, and our ability to realize gains from the settlement of such

assets.

Our general financing strategy focuses on the use of match-funded structures. This means that we seek to match the maturities of our debt obligations with the maturities of our investments to minimize the risk that we have to refinance our liabilities prior to the maturities of our assets, and to reduce the impact of changing interest rates on our earnings. In addition, we generally match-fund interest rates on our investments with like-kind debt (i.e., fixed rate assets are financed with fixed rate debt and floating rate assets are financed with floating rate debt), directly or through the use of interest rate swaps, caps or other financial instruments, or through a combination of these strategies, which allows us to reduce the impact of changing interest rates on our earnings. See "Quantitative and Qualitative Disclosures About Market Risk - Interest Rate Exposure" below.

#### Real Estate Securities

Interest rate changes may also impact our net book value as our real estate securities and related hedge derivatives are marked to market each quarter. Our loan investments and debt obligations are not marked to market. Generally, as interest rates increase, the value of our fixed rate securities decreases, and as interest rates decrease, the value of such securities will increase. In general, we would expect that over time, decreases in the value of our real estate securities portfolio attributable to interest rate changes will be offset to some degree by increases in the value of our swaps, and vice versa. However, the relationship between spreads on securities and spreads on swaps may vary from time to time, resulting in a net aggregate book value increase or decline. Our real estate securities portfolio is largely financed to maturity through long-term CBO financings that are not redeemable as a result of book value changes. Accordingly, unless there is a material impairment in value that would result in a payment not being received on a security, changes in the book value of our securities portfolio will not directly affect our recurring earnings or our ability to pay dividends.

The commercial mortgage and asset backed securities we invest in are generally junior in right of payment of interest and principal to one or more senior classes, but benefit from the support of one or more subordinate classes of securities or other form of credit support within a securitization transaction. The senior unsecured REIT debt securities we invest in reflect comparable credit risk. Credit risk refers to each individual borrower's ability to make required interest and principal payments on the scheduled due dates. We believe, based on our due diligence process, that these securities offer attractive risk-adjusted returns with long-term principal protection under a variety of default and loss scenarios. While the expected yield on these securities is sensitive to the performance of the underlying assets, the more subordinated securities or other features of the securitization transaction, in the case of commercial mortgage and asset backed securities, and the issuer's underlying equity and subordinated debt, in the case of senior unsecured REIT debt securities, are designed to bear the first risk of default and loss. We further minimize credit risk by actively monitoring our real estate securities portfolio and the underlying credit quality of our holdings and, where appropriate, repositioning our investments to upgrade the credit quality and yield on our investments. While we have not experienced any significant credit losses, in the event of a significant rising interest rate environment and/or economic downturn, loan and collateral defaults may increase and result in credit losses that would adversely affect our liquidity and operating results.

23

Our real estate securities portfolio is diversified by asset type, industry, location and issuer. At March 31, 2005, we had 456 real estate securities and loans, excluding the ICH CMO loans as described above. Our largest investment in a real estate security or real estate related loan was \$85.3 million and our average investment size was \$8.3 million at March 31, 2005. Furthermore, our real estate securities are supported by pools of underlying loans. For instance, our CMBS investments had over 16,100 underlying loans at March 31, 2005. We expect that this diversification also helps to minimize the risk of capital loss. At March 31, 2005, our real estate securities and real estate related loans (excluding the ICH CMO loans) had an overall weighted average credit rating of approximately BBB-, and approximately 70% had an investment grade rating (BBB- or higher).

Our real estate securities are also subject to spread risk. Our fixed rate securities are valued based on a market credit spread over the rate payable on fixed rate U.S. Treasuries of like maturity. In other words, their value is dependent on the yield demanded on such securities by the market based on their credit relative to U.S. Treasuries. Excessive supply of such securities combined with reduced demand will generally cause the market to require a higher yield on such securities, resulting in the use of a higher (or "wider") spread over the benchmark rate (usually the applicable U.S. Treasury security yield) to value such securities. Under such conditions, the value of our real estate securities portfolio would tend to decline. Conversely, if the spread used to value such securities were to decrease (or "tighten"), the value of our real estate securities portfolio would tend to increase. Our floating rate securities are valued based on a market credit spread over LIBOR and are effected similarly by

changes in LIBOR spreads. Such changes in the market value of our real estate securities portfolio may affect our net equity, net income or cash flow directly through their impact on unrealized gains or losses on available-for-sale securities, and therefore our ability to realize gains on such securities, or indirectly through their impact on our ability to borrow and access capital. If the value of our securities subject to repurchase agreements were to decline, it could affect our ability to refinance such securities upon the maturity of the related repurchase agreements. See "Quantitative and Qualitative Disclosures About Market Risk - Credit Spread Curve Exposure" below.

Furthermore, shifts in the U.S. Treasury yield curve, which represents the market's expectations of future interest rates, would also affect the yield required on our real estate securities and therefore their value. This would have similar effects on our real estate securities portfolio and our financial position and operations to a change in spreads.

#### Loans

Similar to our real estate securities portfolio, we are subject to credit and spread risk with respect to our real estate related, commercial mortgage and residential mortgage loan portfolios. However, unlike our real estate securities portfolio, our loans do not benefit from the support of junior classes of securities, but rather bear the first risk of default and loss. We believe that this credit risk is mitigated through our due diligence process and periodic reviews of the borrower's payment history, delinquency status, and the relationship of the loan balance to the underlying property value. At March 31, 2005, our residential mortgage loan portfolio was characterized by high credit quality borrowers with a weighted average FICO score of 716 at origination, and had a weighted average loan to value ratio of 72.9%. As of March 31, 2005, approximately \$507.9 million face amount of our residential mortgage loans were held in securitized form, of which over 94% of the principal balance was AAA rated.

Our loan portfolios are diversified by geographic location and by borrower. We believe that this diversification also helps to minimize the risk of capital loss.

Our loan portfolios are also subject to spread risk. Our floating rate loans are valued based on a market credit spread to LIBOR. The value of the loans is dependent upon the yield demanded by the market based on their credit relative to LIBOR. The value of our floating rate loans would tend to decline should the market require a higher yield on such loans, resulting in the use of a higher spread over the benchmark rate (usually the applicable LIBOR yield). Our fixed rate loans are valued based on a market credit spread over U.S. Treasuries and are effected similarly by changes in U.S. Treasury spreads. If the value of our loans subject to repurchase agreements were to decline, it could affect our ability to refinance such loans upon the maturity of the related repurchase agreements.

Any credit or spread losses incurred with respect to our loan portfolios would effect us in the same way as similar losses on our real estate securities portfolio as described above, except that our loan portfolios are not marked to market.

#### OFF-BALANCE SHEET ARRANGEMENTS

As of March 31, 2005, we had the following material off-balance sheet arrangements:

- The \$41.8 million carrying value of our deposit on our seventh real estate securities portfolio, as described above under "-Liquidity and Capital Resources." Except as a result of our gross negligence, willful misconduct or breach of contract, our potential loss is limited to the amount shown, which is included in our consolidated balance sheet.
- A guarantee of certain payments under an interest rate swap which may be entered into in 2007 in connection with the securitization of the Bell Canada portfolio, if the related bonds are not fully repaid by such date. We believe the fair value of this guarantee is negligible at March 31, 2005.

24

At this time, we do not anticipate a substantial risk of incurring a loss with respect to any of the arrangements.

We are also party to two total return swaps which are treated as non-hedge derivatives. For further information on these investments, see "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources."

#### CONTRACTUAL OBLIGATIONS

During the first three months of 2005, we had all of the material contractual

obligations referred to in our annual report on Form 10-K for the year ended December 31, 2004, as well as the following:

Contract Category	Change
Other bonds payable	The financing for the January 2005 purchase of a portfolio of manufactured housing loans was obtained.

The terms of these contracts are described under "Quantitative and Qualitative Disclosures About Market Risk" below.

#### INFLATION

We believe that our risk of increases in the market interest rates on our floating rate debt as a result of inflation is largely offset by our use of match-funding and hedging instruments as described above. See "Quantitative and Qualitative Disclosure About Market Risk -- Interest Rate Exposure" below.

Substantially all of our office leases provide for separate escalations of real estate taxes and operating expenses over a base amount, and/or increases in the base rent based on changes in a Belgian index with respect to the LIV portfolio. We believe that inflationary increases in expenses will generally be offset by the expense reimbursements and contractual rent increases described above.

#### FUNDS FROM OPERATIONS

We believe FFO is one appropriate measure of the operating performance of real estate companies because it provides investors with information regarding our ability to service debt and make capital expenditures. We also believe that FFO is an appropriate supplemental disclosure of operating performance for a REIT due to its widespread acceptance and use within the REIT and analyst communities. Furthermore, FFO is used to compute our incentive compensation to the Manager. FFO, for our purposes, represents net income available for common stockholders (computed in accordance with GAAP), excluding extraordinary items, plus depreciation of operating real estate, and after adjustments for unconsolidated subsidiaries, if any. We consider gains and losses on resolution of our investments to be a normal part of our recurring operations and therefore do not exclude such gains and losses when arriving at FFO. Adjustments for unconsolidated subsidiaries, if any, are calculated to reflect FFO on the same basis. FFO prior to the commencement of our operations includes certain adjustments related to our predecessor's investment in Fund I. FFO does not represent cash generated from operating activities in accordance with GAAP and therefore should not be considered an alternative to net income as an indicator of our operating performance or as an alternative to cash flow as a measure of liquidity and is not necessarily indicative of cash available to fund cash needs. Our calculation of FFO may be different from the calculation used by other companies and, therefore, comparability may be limited.

Funds from Operations (FFO) is calculated as follows for the three months ended March 31, 2005 (unaudited) (in thousands):

Income available for common stockholders	\$27,161
Operating real estate depreciation	291
Accumulated depreciation on operating real estate sold	(1,829)
Funds from Operations (FFO)	\$25,623

Funds from Operations was derived from the Company's segments as follows (unaudited) (in thousands):

	Book Equity at March 31, 2005	Average Invested Common Equity for the Three Months Ended March 31, 2005 (2)	FFO for the Three Months Ended March 31, 2005	Return on Invested Common Equity (ROE) (3)
Real estate securities and real estate related loans	\$678,296	\$655,159	\$28,739	17.6%
Operating real estate	54,332	63,226	954	6.0%
Residential mortgage loans	106,721	92,619	3,413	14.7%
Unallocated (1)	(68,424)	(53,122)	(7,483)	N/A

Total (2)	770,925	\$757,882	\$25,623	13.5%
Preferred stock	62,500			
Accumulated depreciation	(2,986)			
Accumulated other comprehensive income	71,042			
Net book equity	\$901,481			

</TABLE>

- (1) Unallocated FFO represents (\$1,523) of preferred dividends and (\$5,960) of corporate general and administrative expense, management fees and incentive compensation for the three months ended March 31, 2005.
- (2) Invested common equity is equal to book equity excluding preferred stock, accumulated depreciation and accumulated other comprehensive income.
- (3) FFO divided by average invested common equity, annualized.

#### RELATED PARTY TRANSACTIONS

In January 2005, we entered into a servicing agreement with a portfolio company of a private equity fund advised by an affiliate of our manager for such company to service a portfolio of manufactured housing loans. As compensation under the servicing agreement, the portfolio company will receive, on a monthly basis, a net servicing fee equal to 1.00% per annum on the unpaid principal balance of the loans being serviced. We acquired a portfolio of such loans in January 2005 at a cost of approximately \$308.2 million.

26

#### ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the exposure to loss resulting from changes in interest rates, credit spreads, foreign currency exchange rates, commodity prices and equity prices. The primary market risks that we are exposed to are interest rate risk, credit spread risk and foreign currency exchange rate risk. These risks are highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations and other factors beyond our control. All of our market risk sensitive assets, liabilities and related derivative positions are for non-trading purposes only. For a further understanding of how market risk may affect our financial position or operating results, please refer to "Management's Discussion and Analysis of Financial Condition and Results of Operations - Application of Critical Accounting Policies."

#### INTEREST RATE EXPOSURE

Our primary interest rate exposures relate to our real estate securities, loans and floating rate debt obligations, as well as our interest rate swaps and caps. Changes in the general level of interest rates can affect our net interest income, which is the difference between the interest income earned on interest-earning assets and the interest expense incurred in connection with our interest-bearing liabilities and hedges. Changes in the level of interest rates also can affect, among other things, our ability to acquire real estate securities and loans, the value of our real estate securities, loans and derivatives, and our ability to realize gains from the settlement of such assets. While our strategy is to utilize interest rate swaps, caps and match-funded financings in order to limit the effects of changes in interest rates on our operations, there can be no assurance that our profitability will not be adversely affected during any period as a result of changing interest rates. As of March 31, 2005, a 100 basis point increase in short term interest rates would increase our earnings by approximately \$0.9 million per annum.

While we have not experienced any significant credit losses, in the event of a significant rising interest rate environment and/or economic downturn, loan and collateral defaults may increase and result in credit losses that would adversely affect our liquidity and operating results.

Interest rate changes may also impact our net book value as our real estate securities and related hedge derivatives are marked to market each quarter. Our loan investments and debt obligations are not marked to market. Generally, as interest rates increase, the value of our fixed rate securities decreases, and as interest rates decrease, the value of such securities will increase. In general, we would expect that over time, decreases in the value of our real estate securities portfolio attributable to interest rate changes will be offset to some degree by increases in the value of our swaps, and vice versa. However, the relationship between spreads on securities and spreads on swaps may vary from time to time, resulting in a net aggregate book value increase or decline. Our real estate securities portfolio is largely financed to maturity through long-term CBO financings that are not redeemable as a result of book value changes. Accordingly, unless there is a material impairment in value that would result in a payment not being received on a security, changes in the book value of our portfolio will not directly affect our recurring earnings or our ability

to pay a dividend. As of March 31, 2005, a 100 basis point change in short term interest rates would impact our net book value by approximately \$38.1 million.

Our general financing strategy focuses on the use of match-funded structures. This means that we seek to match the maturities of our debt obligations with the maturities of our investments to minimize the risk that we have to refinance our liabilities prior to the maturities of our assets, and to reduce the impact of changing interest rates on our earnings. In addition, we generally match-fund interest rates on our investments with like-kind debt (i.e., fixed rate assets are financed with fixed rate debt and floating rate assets are financed with floating rate debt), directly or through the use of interest rate swaps, caps, or other financial instruments, or through a combination of these strategies, which allows us to reduce the impact of changing interest rates on our earnings. Our real estate securities and real estate related loan portfolio, excluding the ICH CMO loans as described below, and their respective liabilities had weighted average lives of 5.22 years and 5.36 years, respectively, as of March 31, 2005. Our financing strategy is dependent on our ability to place the match-funded debt we use to finance our investments at rates that provide a positive net spread. If spreads for such liabilities widen or if demand for such liabilities ceases to exist, then our ability to execute future financings will be severely restricted.

Interest rate swaps are agreements in which a series of interest rate flows are exchanged with a third party (counterparty) over a prescribed period. The notional amount on which swaps are based is not exchanged. In general, our swaps are "pay fixed" swaps involving the exchange of floating rate interest payments from the counterparty for fixed interest payments from us. This can effectively convert a floating rate debt obligation into a fixed rate debt obligation.

Similarly, an interest rate cap or floor agreement is a contract in which we purchase a cap or floor contract on a notional face amount. We will make an up-front payment to the counterparty for which the counterparty agrees to make future payments to us should the reference rate (typically one- or three-month LIBOR) rise above (cap agreements) or fall below (floor agreements) the "strike" rate specified in the contract. Should the reference rate rise above the contractual strike rate in a cap, we will earn cap income; should the reference rate fall below the contractual strike rate in a floor, we will earn floor income. Payments on an annualized basis will equal the contractual notional face amount multiplied by the difference between the actual reference rate and the contracted strike rate.

27

While a REIT may utilize these types of derivative instruments to hedge interest rate risk on its liabilities or for other purposes, such derivative instruments could generate income that is not qualified income for purposes of maintaining REIT status. As a consequence, we may only engage in such instruments to hedge such risks within the constraints of maintaining our standing as a REIT. We do not enter into derivative contracts for speculative purposes nor as a hedge against changes in credit risk.

Our hedging transactions using derivative instruments also involve certain additional risks such as counterparty credit risk, the enforceability of hedging contracts and the risk that unanticipated and significant changes in interest rates will cause a significant loss of basis in the contract. The counterparties to our derivative arrangements are major financial institutions with high credit ratings with which we and our affiliates may also have other financial relationships. As a result, we do not anticipate that any of these counterparties will fail to meet their obligations. There can be no assurance that we will be able to adequately protect against the foregoing risks and will ultimately realize an economic benefit that exceeds the related amounts incurred in connection with engaging in such hedging strategies.

#### CREDIT SPREAD CURVE EXPOSURE

Our real estate securities are also subject to spread risk. Our fixed rate securities are valued based on a market credit spread over the rate payable on fixed rate U.S. Treasuries of like maturity. In other words, their value is dependent on the yield demanded on such securities by the market based on their credit relative to U.S. Treasuries. Excessive supply of such securities combined with reduced demand will generally cause the market to require a higher yield on such securities, resulting in the use of higher (or "wider") spread over the benchmark rate (usually the applicable U.S. Treasury security yield) to value such securities. Under such conditions, the value of our real estate securities portfolio would tend to decline. Conversely, if the spread used to value such securities were to decrease (or "tighten"), the value of our real estate securities portfolio would tend to increase. Our floating rate securities are valued based on a market credit spread over LIBOR and are effected similarly by changes in LIBOR spreads. Such changes in the market value of our real estate securities portfolio may effect our net equity, net income or cash flow directly through their impact on unrealized gains or losses on available-for-sale securities, and therefore our ability to realize gains on such securities, or indirectly through their impact on our ability to borrow and access capital.

Furthermore, shifts in the U.S. Treasury yield curve, which represents the market's expectations of future interest rates, would also effect the yield required on our real estate securities and therefore their value. This would have similar effects on our real estate securities portfolio and our financial position and operations to a change in spreads.

Our loan portfolios are also subject to spread risk. Our floating rate loans are valued based on a market credit spread to LIBOR. The value of the loans is dependent upon the yield demanded by the market based on their credit relative to LIBOR. The value of our floating rate loans would tend to decline should the market require a higher yield on such loans, resulting in the use of a higher spread over the benchmark rate (usually the applicable LIBOR yield). Our fixed rate loans are valued based on a market credit spread over U.S. Treasuries and are effected similarly by changes in U.S. Treasury spreads. If the value of our loans subject to repurchase agreements were to decline, it could affect our ability to refinance such loans upon the maturity of the related repurchase agreements.

Any decreases in the value of our loan portfolios due to spread changes would effect us in the same way as similar changes to our real estate securities portfolio as described above, except that our loan portfolios are not marked to market.

As of March 31, 2005, an immediate 25 basis point movement in credit spreads would impact our net book value by approximately \$37.4 million, but would not directly affect our earnings or cash flow.

#### CURRENCY RATE EXPOSURE

Our primary foreign currency exchange rate exposures relate to our operating real estate and related leases. Our principal direct currency exposures are to the Euro and the Canadian Dollar. Changes in the currency rates can adversely impact the fair values and earnings streams of our non-U.S. holdings. We have attempted to mitigate this impact in part by utilizing local currency-denominated financing on our foreign investments to partially hedge, in effect, these assets.

We have investments in the LIV portfolio and the Bell Canada portfolio. These properties are financed utilizing debt denominated in their respective local currencies (the Euro and the Canadian Dollar). The net equity invested in these portfolios at March 31, 2005, approximately \$12.8 million and \$24.7 million, respectively, is exposed to foreign currency exchange risk.

#### FAIR VALUES

For certain of our financial instruments, fair values are not readily available since there are no active trading markets as characterized by current exchanges between willing parties. Accordingly, fair values can only be derived or estimated for these instruments using various valuation techniques, such as computing the present value of estimated future cash flows using discount rates commensurate with the risks involved. However, the determination of estimated future cash flows is inherently subjective and imprecise. We note that minor changes in assumptions or estimation methodologies can have a material effect on these derived or estimated fair values, and that the fair values reflected below are indicative of the interest rate, credit spread and currency rate environments as of March 31, 2005 and do not take into consideration the effects of subsequent interest rate, credit spread or currency rate fluctuations.

We note that the values of our investments in real estate securities, loans and derivative instruments, primarily interest rate hedges on our debt obligations, are sensitive to changes in market interest rates, interest rate spreads, credit spreads and other market factors. The value of these investments can vary, and has varied, materially from period to period.

#### Interest Rate Risk

We held the following interest rate and credit spread risk sensitive instruments at March 31, 2005 (unaudited) (dollars in thousands):

<TABLE>  
<CAPTION>

Fair Value	Carrying Value	Principal Balance or Notional Amount	Weighted Average Yield/Funding Cost	Maturity Date
-----	-----	-----	-----	-----
<S>	<C>	<C>	<C>	<C>
<C>				
ASSETS:				
Real estate securities, available for sale (1) \$3,429,088	\$3,429,088	\$3,418,981	6.23%	(1)
Real estate securities portfolio deposit (2)	41,793	(2)	(2)	(2)

41,793				
Real estate related loans (3)	567,489	569,970	7.71%	(3)
571,249				
Residential mortgage loans (4)	888,979	896,498	5.15%	(4)
888,979				
Interest rate caps, treated as hedges (5)	2,591	381,909	N/A	(5)
2,591				
Interest rate swaps, treated as hedges (6)	31,696	2,119,950	N/A	(6)
31,696				
Total return swaps (7)	2,047	206,760	N/A	(7)
2,047				

LIABILITIES:

CBO bonds payable (8)	2,656,427	2,680,508	4.76%	(8)
2,716,079				
Other bonds payable (9)	436,509	437,503	6.00%	(9)
443,144				
Notes payable (10)	586,680	586,680	3.32%	(10)
586,680				
Repurchase agreements (11)	597,270	597,270	4.05%	(11)
597,270				
Non-hedge derivative obligations (12)	527	(12)	N/A	(12)
527				

</TABLE>

(1) These securities contain various terms, including fixed and floating rates, self-amortizing and interest only. Their weighted average maturity is 5.54 years. The fair value of these securities is estimated by obtaining third party broker quotations, if available and practicable, and counterparty quotations.

(2) The fair value of the real estate securities portfolio deposit, which is treated as a non-hedge derivative, is determined by obtaining third party broker quotations on the underlying securities, if available and practicable, and counterparty quotations, including a counterparty quotation on the portion of the fair value resulting from the Excess Carry Amount, as defined, earned on such deposit. See "Management's Discussion and Analysis of Financial Condition and Results of Operations-Liquidity and Capital Resources" for a further discussion of this deposit.

(3) Represents the following loans:

<TABLE>

<CAPTION>

Loan Type	Carrying Value	Loan Count	Weighted Avg. Yield	Weighted Average Maturity (Years)	Floating Rate Loans as a % of Carrying Amount	Fair Value
<S>	<C>	<C>	<C>	<C>	<C>	<C>
B-Notes	\$117,598	22	6.85%	2.52	83.5%	\$117,598
Mezzanine Loans	103,538	5	7.27%	2.27	100.0%	103,538
Bank Loans	146,299	3	7.14%	1.89	100.0%	146,299
Real Estate Loans	12,182	1	19.73%	2.75	--%	12,329
ICH CMO Loans	187,872	115	8.17%	2.51	2.0%	191,485
	-----	---	-----	----	-----	-----
	\$567,489	146	7.71%	2.31	62.0%	\$571,249
	=====	===	=====	=====	=====	=====

</TABLE>

29

The fixed rate B-Notes were valued by obtaining counterparty quotations. The rest of the B-Notes as well as the mezzanine loans, bank loans, and real estate loans, with one exception, bear floating rates of interest and we believe that, for similar financial instruments with comparable credit risks, their effective rates approximate market rates. Accordingly, the carrying amounts outstanding are believed to approximate fair value. The one fixed rate loan was valued by discounting expected future receipts by a rate calculated by imputing a spread over a market index on the date of borrowing. The ICH CMO loans were valued by discounting expected future receipts by a rate calculated based on current market conditions for comparable financial instruments, including market interest rates and credit spreads.

(4) This aggregate portfolio of residential loans consists of a portfolio of floating rate residential mortgage loans as well as a portfolio of primarily fixed rate manufactured home loans. The portfolio of residential mortgage loans has a weighted average maturity of 3.74 years. We believe that, for similar financial instruments with comparable credit risks, the effective rate on this portfolio approximates a market rate. Accordingly, the carrying amount of this portfolio is believed to approximate fair value. The manufactured housing loan portfolio, which has a weighted average maturity of 4.92 years, was valued by discounting expected future receipts by a rate calculated based on current market conditions for comparable financial instruments, including market interest rates and

credit spreads. Based on this analysis, the carrying amount of this portfolio is believed to approximate fair value.

(5) Represents cap agreements as follows:

Notional Balance	Effective Date	Maturity Date	Capped Rate	Strike Rate	Fair Value
\$302,290	Current	March 2009	1-Month LIBOR	6.50%	\$ 502
18,000	January 2010	October 2015	3-Month LIBOR	8.00%	404
8,619	December 2010	June 2015	3-Month LIBOR	7.00%	588
53,000	May 2011	September 2015	1-Month LIBOR	7.50%	1,097
\$381,909					\$2,591

The fair value of these agreements is estimated by obtaining counterparty quotations.

(6) Represents swap agreements as follows (in thousands):

Notional Balance	Effective Date	Maturity Date	Swapped Rate	Fixed Rate	Fair Value

(7) Represents total return swaps which are treated as non-hedge derivatives. The fair value of these agreements, which is included in Derivative Assets, is estimated by obtaining counterparty quotations. See "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources" for a further discussion of these swaps.

30

(8) These bonds were valued by discounting expected future payments by a rate calculated based on current market conditions for comparable financial instruments, including market interest rates and credit spreads. The weighted average maturity of the CBO bonds payable is 6.56 years. The CBO bonds payable amortize principal prior to maturity based on collateral receipts, subject to reinvestment requirements.

(9) The Bell Canada bonds were valued, in U.S. dollars at the period end exchange rate, by discounting expected future payments by a rate calculated by imputing a spread over a market index on the date of borrowing. It amortizes principal periodically with a balloon payment at maturity in April 2012. The ICH CMO bonds were valued by discounting expected future payments by a rate calculated based on current market conditions for comparable financial instruments, including market interest rates and credit spreads. They amortize principal prior to maturity based on collateral receipts and their final stated maturity is in August 2030. The manufactured housing loan bonds mature in January 2006, bear a floating rate of interest, and are subject to adjustment monthly based on the agreed

upon market value of the loan portfolio. We believe that, for similar financial instruments with comparable credit risks, their effective rate approximates a market rate. Accordingly, the carrying amount outstanding is believed to approximate fair value.

- (10) The first real estate related loan financing matures in November 2006, bears a floating rate of interest and amortizes principal based on collateral receipts. The second real estate related loan financing matures in February 2006, bears a floating rate of interest, and amortizes principal based on collateral receipts. The residential mortgage loan financing matures in November 2007, bears a floating rate of interest, and is subject to adjustment monthly based on the agreed upon market value of the loan portfolio. We believe that, for similar financial instruments with comparable credit risks, their effective rates approximate market rates. Accordingly, the carrying amounts outstanding are believed to approximate fair value.
- (11) These agreements bear floating rates of interest and we believe that, for similar financial instruments with comparable credit risks, the effective rates approximate market rates. Accordingly, the carrying amounts outstanding are believed to approximate fair value. These agreements mature in one to seven months.
- (12) These are two essentially offsetting interest rate caps and two essentially offsetting interest rate swaps, each with notional amounts of \$32.5 million, an interest rate cap with a notional balance of \$17.5 million, and one interest rate swap with a notional amount of \$2.0 million. The maturity date of the purchased swap is July 2009; the maturity date of the sold swap is July 2014, the maturity date of the \$32.5 million caps is July 2038, the maturity date of the \$17.5 million cap is July 2009, and the maturity date of the latter swap is January 2009. The fair value of these agreements is estimated by obtaining counterparty quotations.

#### Currency Rate Risk

We held the following currency rate risk sensitive balances at March 31, 2005 (unaudited) (U.S. dollars; in thousands, except exchange rates):

<TABLE>  
<CAPTION>

	Carrying Amount (USD)	Local Currency	Current Exchange Rate to USD	Effect of a 5% Negative Change in Euro Rate	Effect of a 5% Negative Change in CAD Rate
<S>	<C>	<C>	<C>	<C>	<C>
<b>Assets:</b>					
LIV portfolio	\$12,027	Euro	0.7714	\$ (601)	N/A
Bell Canada portfolio	45,871	CAD	1.2104	N/A	\$ (2,294)
LIV other, net	790	Euro	0.7714	(40)	N/A
Bell Canada other, net	8,297	CAD	1.2104	N/A	(415)
<b>Liabilities:</b>					
Bell Canada bonds	29,500	CAD	1.2104	N/A	1,475
Total				\$ (641)	\$ (1,234)

</TABLE>

USD refers to U.S. dollars; CAD refers to Canadian dollars.

#### ITEM 4. CONTROLS AND PROCEDURES

- (a) Disclosure Controls and Procedures. The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this report. The Company's disclosure controls and procedures are designed to provide reasonable assurance that information is recorded, processed, summarized and reported accurately and on a timely basis. Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, the Company's disclosure controls and procedures are effective.
- (b) Internal Control Over Financial Reporting. There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

## PART II. OTHER INFORMATION

## ITEM 1. LEGAL PROCEEDINGS

The Company is not party to any material legal proceedings.

## ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

## ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

## ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

## ITEM 5. OTHER INFORMATION

None.

## ITEM 6. EXHIBITS

- 3.1 Articles of Amendment and Restatement (incorporated by reference to the Registrant's Registration Statement on Form S-11 (File No. 333-90578), Exhibit 3.1).
- 3.2 Articles Supplementary Relating to the Series B Preferred Stock (incorporated by reference to the Registrant's Quarterly Report on Form 10-Q for the period ended March 31, 2003, Exhibit 3.3).
- 3.3 By-laws (incorporated by reference to the Registrant's Registration Statement on Form S-11 (File No. 333-90578), Exhibit 3.2).
- 4.1 Rights Agreement between the Registrant and American Stock Transfer and Trust Company, as Rights Agent, dated October 16, 2002 (incorporated by reference to the Registrant's Quarterly Report on Form 10-Q for the period ended September 30, 2002, Exhibit 4.1).
- 10.1 Amended and Restated Management and Advisory Agreement by and among the Registrant and Fortress Investment Group LLC, dated September 23, 2003 (incorporated by reference to the Registrant's Registration Statement on Form S-11 (File No. 333-106135), Exhibit 10.1).
- 31.1 Certification of Chief Executive Officer as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification of Chief Financial Officer as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1 Certification of Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- 32.2 Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

## SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized:

NEWCASTLE INVESTMENT CORP.  
(REGISTRANT)

By: /s/ Wesley R. Edens

-----  
Name: Wesley R. Edens  
Title: Chairman of the Board  
Chief Executive Officer

## CERTIFICATION OF CHIEF EXECUTIVE OFFICER

I, Wesley R. Edens, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Newcastle Investment Corp.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
  - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

EXHIBIT 32.1

CERTIFICATION OF CEO PURSUANT TO  
18 U.S.C. SECTION 1350,  
AS ADOPTED PURSUANT TO  
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Quarterly Report on Form 10-Q of Newcastle Investment Corp. (the "Company") for the quarterly period ended March 31, 2005 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), Wesley R. Edens, as Chief Executive Officer of the Company, hereby certifies, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that, to the best of his knowledge:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

/s/ Wesley R. Edens
